Skills

Comfortable: C/C++ JavaScript ReactJS Python React Native HTML CSS Bootstrap

Familiar: TypeScript Redux Node MongoDB Material-UI Netlify Heroku Ant-design

Tools: VS Code Git Firebase Elementor Adobe Xd Figma Photoshop Illustrator

Experience

💼 Junior Front-End Developer | **Qubitech Solutions** | Rajshahi

📅 June 2022 - November 2022

Responsibilities:

- Played an integral role in **MERN stack** web application development, utilizing **Redux**, and **Tailwind CSS**.
- Assisted in implementing Redux for improved **state management** and user experiences
- Developed **responsive** user interfaces using **Material UI**, enhancing visual appeal and user engagement
- Actively participated in agile project management using *Trello*, ensuring smooth task coordination
- Collaborated closely with **cross-functional teams** to deliver quality projects aligned with business goals

Projects

📁 Give - A non-profit fundraising website (MERN)

📅 August 2021

Project Features:

- Built MERN app for cash donations, campaigns, and custom giving, with **admin-controlled** features
- Implemented a public **donation sharing feature**, showcasing donor contributions on a timeline
- Employed **Stripe**, **Firebase Auth**, **React Hook Form**, and **SCSS** to develop a versatile donation system

🔗 **Live Site**   **Client Side**   **Server Side**

📁 Muhurto - Wedding Photography Service (MERN)

📅 April 2021

Project Features:

- Enabled authorized users to request, review, and track services via a streamlined dashboard
- Admin panel enables services, users, and reviews management with read, update, and delete permissions
- Used **Firebase Auth** for authenticating user and **Stripe** for the payment gateway

🔗 **Live Site**   **Client Side**   **Server Side**

📁 Jatra – Dhaka Bus Route App (React Native)

📅 September 2022

Project Features:

- This app offers **real-time bus info**, **fares**, and **traffic updates** for Dhaka commuters
- Integrated **Native Base UI**, **Firebase Auth**, and **Firestore** to create an **offline-capable** bus route solution
- Enhanced passenger experience with "Jatra," providing **reliable bus details**, fares, and **estimated arrivals**

🔗 **Overview**   🔗 **Admin Repo**   🔗 **Live Admin Panel**

📁 Shomachar – News App (React Native)

📅 June 2021   👥 Team Project

Project Features:

- Crafted a newsreader application utilizing React Native, and **NewsAPI**
- Provides every trending and latest news from all over the world in seven different category
- Enables the reader to see the original news and **share** them on different platforms.
- Used **Expo**, **Native-base**, **Moment.js** for development and *Jira* for project management

🔗 **Preview**   🔗 **Github Repository**

Education

2018 - 2023   ● **Rajshahi University of Engineering & Technology, Rajshahi**
B.Sc. in Computer Science & Engineering
CGPA: 3.60 (First Class 15th)

2015 - 2017   ○ **Notre Dame College, Dhaka**
Science
Got govt. scholarship with GPA-5.00 (out of 5.00)

Accomplishments

🏅 **Complete Web Development Course** (Programming Hero)

Completed comprehensive **MERN web dev course**, mastering HTML, CSS, JavaScript, ReactJS, Node.js, MongoDB, and debugging. Constructed 11 functional websites, excelled in **SCIC batch** with 95% avg. assignment score.

🔗 **Certificate**   🔗 **Black Belt**

🏅 **Foundations of User Experience (UX) Design** (Google)

Coursera-certified in UI/UX design, adept in **user-centered principles**, **design process**, **accessibility**, and **design sprints** for collaborative cross-functional projects.

🔗 **Certificate**

🏅 **Python For Everybody Specialization** (Coursera)

Attained full mastery of **five specialized courses**, achieving a flawless 100% grade in every courses.

🔗 **Certificate**
